

I listen to Air1 everyday and depend on it for bringing me a positive message without the irritating advertisements or corrupted language that is heard on other radio stations. God impacts me and others through Air1 and it is very important that Air1 will be kept on the radio. I tell people about Air1 all the time and I have a bumper sticker on my car because this is how much I believe the community needs to know about Air1. If Air1 was to not play on the radio in my area there will be people in this community not hearing and being impacted by God's message of love. I strongly believe that messages from this radio station are helping people everyday when they need it the most. I believe people either see my bumper sticker while driving behind me and decided to tune in or hear about Air1 from a friend, and it is those moments that God speaks to them and saves their life. Please, Please, Please, allow this radio station to be on the air because this community needs and wants to continue to listen to the positive points God brings everyday through the songs and messages on Air 1 radio.
